New Department.

The committee was deeply impressed with the magnitude of the State's interests in this institution, with the great importance of the work that is being done there, and with its capacity for usefulness which has been steadily increasing, and will continue to increase. It its affairs are wisely administered, as they appear to have been in the past, and it is properly sustained by the State, as doubtiess it will be.

The committee noted the fact as worthy of attention that there is no schemate department of mining engineering in the institution, sithough much work is done there which would be embraced in such a course. Referring to the syldence on that subject as continued in the testimony of Dr. McBiryde and Colonel Marr, the dean of the engineering department, in view of the importance of this matter, and the comparatively small cost, as indicated by the restimony, at which a points could be offered, your committee thinks proper to call especial attention to this subject, and to respectfully recommend that such a department be added to the institution as soon as practicable.

Respectfully submitted.

BIDS TOO HIGH.

Plans for Colored Almshouse Will Be Modified.

The Council Committee on Relief of the Poor met yesterday afternoon at 5 o cleek, the principal business before the committee, and in fact, practically the only business, being the opening of tids for the construction of the new negro almshouse building. The sum available for the construction of the new negro almshouse building. The sum available for the construction of the building according to the plans drawn by Architect Charles K. Hryant and estimates submitted by him was \$6,000.

When the bids were opened it was found that the lowest of the five or six offered was just \$6,000 in excess of the appropriation, and a prolonged discussion enaued as to whether the contract should be awarded to the lowest bidder and the Council asked for a supplementary appropriation to meet the difference.

Finally Mr. Satterfield declared that he would never go back to the Council asking one cent more. He finally moved that he bids be rejected and that a subcommittee be named to 80 amend the limit of cost, and then advertise anow for bids. This solution of the rangle was finally agreed upon, and so the matter goes over for the present.
